- (b) Notwithstanding that streets, lanes, and public utility rights-of-way may be within the zone boundaries, the regulations contained in this By-law shall not be deemed to be applicable to said streets, lanes and public utility rights-of-way;
- (c) Boundaries indicated as following the centrelines of streets, highways or lanes shall be construed as following such centrelines;
- (d) Boundaries indicated as following lot, site or property holding lines on a registered plan shall be construed as following such lot, site or property holding lines;

- (f) Boundaries indicated as following the centrelines of railway lines or railway rights-of-way or public utility rights-of-way shall be construed to be midway between the main tracks or the centre of the rights-of-way, as the case may be;
- (g) If a street, lane or Government Road Allowance shown on the Zoning Map is lawfully closed, the land formerly comprising the street or lane or government road allowance shall be included within the zone of the adjoining land; however, if the said street or lane or government road allowance was a zoning boundary between two or more different zones, the new zoning boundary shall be the former centreline of the closed street or lane or government road allowance, except where the closed road is being

transferred to an adjoining owner, in which case the boundary shall follow the limit of the consolidated property.

3.3 GENERAL USE REGULATIONS APPLYING TO ALL ZONES

The general provisions applying to all zones are contained within this Part. Also applying to these zones are the provisions of Part 1 - "Definitions", Part 2 - "Administration" and "Appendix A".

3.3.1 INTERPRETATION OF REGULATIONS

In their interpretation and application, the provisions of this Part and the provisions of all zones established herein shall be held to be the minimum requirements to satisfy the intent and purposes set forth in each zone.

3.3.2 GENERAL

No land shall be used or occupied and no structure shall be erected, altered, used or occupied hereinafter for any use in any zone in which such land or structure is located other than a use listed in the Use and Bulk Tables of the respective zone except:

- (a) The use and bulk tables applicable to each zone of this by-law are intended to regulate the use and development of land within that zone. Any use listed as a permitted use in a given zone may be developed on any site within that zone provided all requirements are complied with. Conditional uses listed in a particular zone may be permitted subject to any additional conditions that may be applied by means of a conditional use order as provided for in The Act.
- (b) The use and bulk tables contained within this by-law have been constructed in such a manner that most requirements for a permitted or conditional use are listed on the table. The permitted and conditional uses of a given zone are listed vertically along the left hand side. The bulk regulations pertaining to a particular use, such as site area, yard, building, parking space and sign requirements are listed on the Table to the right of each permitted use. Where one requirement pertains to more than one use, the applicable requirement is that located in the space directly to the right of the use listed. Exceptions to specific requirements are footnoted and located at the bottom of the table or at the bottom of the continued table.

Projections from the main buildings, such as eaves and chimneys, although not permitted in themselves, are listed in the permitted use column. The yard requirements for projections are located on the table to the right of the projection listed and are the minimum distances that must be maintained from any projection to a site line on the site in which the building is located.

(c) Retention of Bulk Regulations

- (i) It shall be the continuing obligation of the owner to maintain the minimum site area, yards and other open spaces required herein for any use as long as it remains in existence.

- (iii) All yards and other open spaces required for any use shall be located on the same site as the use.
- (iv) Where a site is occupied for a use permitted in a zone and has no buildings or structures thereon, the required yards for the zone within which it is located shall be provided and maintained.
- (v) No building or structure shall be permitted on a corner site when such building or structure is to be oriented in such a manner as to reduce the front yard requirement on the street on which such corner site has its frontage at the time this Zoning By-law becomes effective.

3.3.5 FRONT YARD EXCEPTIONS

Where sites comprising forty percent (40%) or more of the entire frontage of the block (excluding reverse corner sites) are developed with buildings, the average front yard depths established by such buildings shall establish the minimum front yard depths for the entire frontage of the block provided such average is less than the minimum front yard required in the Zone in which the site is located.

3.3.6 SUBDIVIDING LAND AND SITE SIZE REQUIREMENTS

- (a) No parcel of land shall hereafter be divided into sites, unless each site conforms with the regulations set forth in the bulk tables for the zone in which said parcel is located.

3.3.16 HEIGHT EXCEPTIONS

The provisions of this By-law shall not apply to limit the height of any ornamental dome, chimney, tower, electrical or telephone transmission line, television or radio mast, steeple, water storage tank, electrical apparatus or the mechanical operation of the building provided that no roof structure or any space above the height limit shall be permitted for the purpose of providing usable floor space. - (i) refuse to issue a building and/or development permit where the proposed building or structure, as determined by Council, is to be located within the floodway of a river, stream, drain or watercourse, and where Council has determined that placement of said structure would impede the flow of flood waters and/or create a hazard to life, limb or property; or
- (ii) Where Council has determined that such hazards do not exist or where the proposed building or structure is to be located within the floodway fringe of a river, stream, drain or watercourse, or is otherwise subject to minor ponding or runoff, permit such lands to be developed provided that:
